# Q-RANGE

Greyhound manufactures its own range of Capillary Columns, Syringe Filters, SPE Cartridges and HPLC Columns known as the 'Q' Range, as well as representing the industry's best known manufacturers.

The Q-Range of products is broken down into 5 different sectors; Q-Range™, Q-Col™, Q-Clean™, Q-Cap™ and Q-Fil™.

All Q-Range™ products are manufactured to the highest specifications in the industry ensuring the products you receive will perform the task they are designed to do and that your analysis runs trouble free time after time.

# Greyhound's Managing Director, Paul Massie

“ I am the Managing Director at Greyhound Chromatography. I started the company over 40 years ago and I am still as passionate and driven today as I was then. Everyday I look forward to the different challenges that day brings. I provide our employees with strategic guidance and direction to ensure the company achieves its set missions, values and objectives.

I support each department to ensure our customers are at the forefront of every decision we make and I am committed to all our customers receiving first class service.”

# Meet the Team

# Full Technical Support Available

Our technical sales team is available to discuss your requirements in detail, from the application of products, to sourcing and prompt delivery. We are able to source hard to find chemicals which are no longer commercially available and are able to supply over 13,000 laboratory chemicals in small, convenient units.

Our Technical Sales team are on hand to provide detailed product usage and product advice. We are able to provide Organic and Inorganic Custom Mixtures, made to your requirements from our ISO accredited manufacturers.

# Our Highly Qualified Logistics Team

Here at Greyhound, we appreciate that receiving goods safely and at the most economical cost is very important. At our company premises, we have highly qualified logistics personnel who are fully trained and qualified in the safe handling of all of the products we supply, including goods that are classed as dangerous to transport.

All export and transport regulations are fully complied with, whether that be by sea, air or road. Our team can advise the most economical method of transport while fully complying with UK transport regulations and the regulations of the country of the final destination. We can also assist with Customs Certification and Declarations, where these are required.

# Certifications

Greyhound Chromatography & Allied Chemicals is currently certified to ISO 9001:2015 standards.

We continue to work hard to maintain; and where possible, improve the high quality of our operating procedures. We source products from approved suppliers around the world. All of whom are accredited to ISO Guide 9001:2015,

We are also certified to ISO 17034:2016 and most recently ISO 14001:2015. This is an internationally agreed standard that sets out the requirements for an environmental management system.
